Keep water flowing all winter long!

You can now have running water 24/7 in below-freezing weather.
No more frozen waterlines!

- The PIRIT Heated Hose: A hose that works in below-freezing temperatures. Maintain a water line 24/7 throughout the winter or use for periodic tasks. **No more lugging water buckets. No more draining hoses.**
- **Thermostatically controlled.** When plugged in, the Series V Heated Hose automatically turns ON at 45°F or lower and, when on, turns OFF at 57°F or higher.
- **Works with standard 110V GFCI outlet.** 100' hose draws only 500 Watts. 50' hose draws only 360 watts. 25' hose draws only 180 watts, 12' draws only 90 Watts.
- **Approved by MET Labs,** a NRTL (Nationally Recognized Testing Laboratory) to UL (499) and CSA (C22.2 no.72 #E112826) safety standards for heated electronic appliances for outdoor use. For added safety, the Series V Heated Hose is grounded, end-to-end, including the nozzles.
